

Local Business Expands Product Line

2009

Brent Schneider, a former MDHS grad, opened Schneider's Computing & Websites Ltd. in 2003, and celebrated their sixth anniversary this past June. Schneider's Computing is launching Bell Mobility and Internet as well as Solo Mobile to their list of services.

Schneider's will also be offering the full line of Bell Mobility and Solo Mobile phones.

Schneider plans to continue to grow the Mitchell store with the addition of LCD TVs, while planning is in the works for a second location in Stratford. The website is currently in development to list thousands of products that aren't available in the showroom, but can be ordered in next business day.

"It will be a great addition to the computer services we already offer," he said in a press release.

Services at Schneider's Computing & Websites Ltd. include computer/notebook sales and repair, office supplies, web design and hosting, and their Xerox copy centre that they offer with a full line of copying and graphic design services from business cards to brochures.

A grand opening for the Bell services is planned for early October, but all the systems are setup and they've already started taking activations.
