DATA SERVERS

Make file sharing a breeze!

Data servers allow you to centralize all of your data on a single computer or server. The server will be setup to make a back-up of your data, and an image of your server automatically. The server can store all your documents, accounting database, and more. Easily share your accounting database, so all of your users can access it. The server can also back-up your individual workstations by saving all of the data to a central data server, so that you don't have to back-up each computer individually. Easily manage group policies, security policies, and more all from a central office server.

MICROSOFT EXCHANGE

Access e-mail anywhere!

Easily access Microsoft Outlook e-mail anywhere including all of your folders, calendars, and e-mails with Microsoft Outlook Web App from any computer worldwide. Sync your e-mail automatically with Blackberry, iPhone, or Android using Microsoft Exchange. There's no need to sync all your devices – your e-mails will be available everywhere you go – on your phone, tablet, computer, and on the Outlook web app from any device worldwide. Share your calendars in your office, so your clients can book appointments with you through your staff.

E-MAIL ANTISPAM SOLUTION

The Simplest Solution is also Most Effective!

ZEROSPAM is a leading Canadian cloud antispam solution that blocks 99.91% of all undesirable email, such as spam, viruses, phishing, executable files and other email-borne threats, with a very low error margin.
